Restriction Requirement

35 U.S.C. § 121

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claim(s) 1 and 90-92, drawn to a **method for increasing retroviral gene transfer efficiencies**, classified in class 435, subclass 456.
- b. Group II, claim(s) 93, drawn to a **polypeptide** represented by **SEQ ID NO.: 13**, classified in class 530, subclass 350.
- c. Group III, claim(s) 94, drawn to a **polypeptide** represented by **SEQ ID NO.: 30**, classified in class 530, subclass 350.
- d. Group IV, claim(s) 95, drawn to a **polypeptide** represented by **SEQ ID NO.: 5**, classified in class 530, subclass 350.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01). In the instant case, the methodology of Group I neither requires nor uses the polypeptides of Groups II-IV.

4. Inventions II-IV are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01). In the instant case, each of the identified groups is directed toward a different polypeptide with different structural and functional characteristics. Separate searches will be required for each group. Therefore, the claims are clearly directed toward different inventive concepts.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and require separate searches, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).
Applicant is also advised that the claims should be amended to reflect the election, where necessary.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(I).

Correspondence

8. Correspondence related to this application may be submitted to Group 1600 by facsimile transmission.
